

FormFox Release 2026.4.1

STRY0134469 - Send RESPIRATOR Digital Workflow image in <ExaminationReport> in FF UOR

Up to three devices can be tested using the OSHA Respirator Fit Qualitative Digital Workflow. Currently, FormFox sends an individual image for each device in the UpdateOrderResult (UOR) under <Images><Image>. FormFox will continue to send the individual images and will also send a combined report of the tested devices under <ExaminationReport>.

- **What is changing:** A combined report of the devices tested will now be sent under <ExaminationReport>, while the individual images will continue to be sent under <Images>.
- **Who this applies to:** API users

STRY0134342 - COSS - Return "Smart" Service Hours on the authorization form

Non-Marketplace authorization forms will display the applicable clinic hours based on the services included on the order. Smart Service Hours use the service categories associated with the ordered services to provide the applicable hours of operation for that visit.

- **What is changing:** Non-Marketplace authorization forms will now display Smart Service Hours for the clinic based on the services ordered
- **Who this applies to:** Recipients of Non-Marketplace authorization forms
