

Workforce LDP and Randoms Support Release (RLSE0011527)

Released January 29th, 2026

STRY0127975 – Pool Details show only active program intervals ensuring accurate and current pool statistics are displayed.

STRY0127491 – Result Exceptions logic disabled for Workforce Implementations configured as Web Oasis implementation type to provide consistent and simplified result handling for Web Oasis type users. (In support of LDP 1.23 Release)

STRY0128143 – Occupation Code Import Validation corrected to allow Occupation Codes to be free text, and allow Occupation Codes over thirty characters to import, and truncated to fit the field so users do not experience issues when importing rosters.

STRY0128272 – Event Merging Enabled for Closed Pool Intervals to ensure result exceptions from prior (closed0 intervals can still be managed as needed.

STRY0127980 – Pending random selections in the Selection Inbox were appearing in the Results Grid before an order was placed. This story addresses the issue so that pending selections will no longer be displayed in Results Grid until an order has been submitted.

STRY0115786 – Removal of Workforce Lab Result Letter if laboratory report image is received for Web Oasis configured Workforce implementations. (In support of LDP 1.23 Release)

Please note that we continue to work on **repairing Notifications in Workforce and anticipate completion of this effort in a Q2 Workforce release. We apologize for the inconvenience and will continue to provide updates.*
