Formfox Release 2025.3

RELEASE NOTES

May 2025

STORIES

API Users - The UpdateOrder process has been changed to perform a true UPDATE to the identified order records as opposed to deleting the existing order and creating a new one.

FormFox MarketPlace Search- Search results are configurable to include more information including truck parking, and if an appointment is required for ordered services.

Clinical Workflow- In the clinical workflow, if the user clicks the "Unable to Draw" button they will be prompted to ender a remark describing why the draw could not be completed.

BAT - In the DOT BAT event capture the Confirmation Test section fields are no longer required when a status of refused or unable is selected.
